GSA Reverse Auctions

ReverseAuctions.gsa.gov

The General Services Administration (GSA) has launched a government managed reverse auction platform, ReverseAuctions.gsa.gov for federal agency use. ReverseAuctions.gsa.gov is an efficient and cost effective platform designed to drive down the total cost of acquisitions and increase savings to customers and taxpayers.

ReverseAuctions.gsa.gov can be used to facilitate the request for and submission of quotes for simple commodities and services through GSA Multiple Award Schedules (MAS) and Blanket Purchase Agreements (BPAs). Via ReverseAuctions.gsa.gov, buyers can solicit simple commodities and services in a robust and competitive environment where the sellers successively bid prices down until the auction time ends. An award can be made to the apparent low bidder provided it meets the terms and conditions of the solicitation and is technically acceptable.

Benefits

- No Additional Fees for products purchased on GSA schedule vehicles
- Streamlines procurement cycle time
- Complies with security requirements
- Provides spend data and historical pricing
- Best suited for lowest price technically acceptable actions
