

IT Asset Disposition

Protecting Data, the Environment and Corporate Brands

Making IT More Secure

Partnering with Ingram Micro, DasNet offers a complete IT Asset Disposition (ITAD) solution through a single source. We specialize in environmentally responsible recycling and reuse of retired IT equipment. Our strict chain-of-custody ensures the security required to manage risk and our industry expertise provides maximum fair market value payout. We can manage all ITAD requirements including logistics, de-installation and removal, packing, receiving, processing, data erasure and destruction, aftermarket services and responsible recycling.

Data Erasure and Destruction

Onsite and offsite degaussing, erasure, and physical shredding services coupled with an industry-leading chain-of-custody process mitigate the risks of a data security breach.

De-Installation and Asset Removal

Onsite service technicians perform hardware de-installations and onsite serialized audits in the office and the data center.

Logistics

Most pickups in the US are completed with Ingram Micro employees and exclusive-use trucks. Onsite services include packaging and palletizing assets to prepare them for shipment

Asset Processing

At our ITAD processing center, each asset is audited and tracked throughout the disposition process.

Responsible Recycling

As a certified e-Stewards Electronics recycler, Ingram Micro adheres to stringent recycling requirements of electronic waste and ensure we are compliant with local, state and federal regulations

About DasNet Corporation

DasNet is a systems engineering firm, headquartered on Long Island, New York, which specializes in the design and engineering, program/project management, integration, installation, testing and commissioning, documentation, analysis, and sustainment services within various IT and infrastructure technology and telecom disciplines. DasNet is a Veteran Owned, Minority Business Enterprise (MBE), an equal opportunity employer, and remains committed to mentorship and equal opportunity programs (MWBES & SDVOBs).
